Busy: 50+ hrs of operation (bold)
 Weak: 20- hrs of operation (underlined)

Map of Abortion Industry's Sites

Prayer Intentions

Some people struggle to pray for a full hour. God will work where you are when you pray. But you can also pray for God to work elsewhere and multiply the power of your prayers.

There are weak sites that are open 20 hours or fewer that can close more easily than other sites. There are **busy** sites that are open 50 hours or more that bring about grave evils.

Referral sites can become webcam abortion sites and they feed abortion businesses, so pray for them, too!

Creating a Web of Prayer

Let's create a web of prayer by praying for each other's Planned Parenthood (PP) and abortion sites!

God is present where two or more are gathered in His Name. When we pray for other sites outside one PP/abortion site, God can act on our prayers for other sites, while doing good where we pray. We want to invite God to be present at each abortion site and each referral site. We want each other's pro-life efforts to grow and experience great success.

By all means, pray for your own site! It's even more important to do so when abortion-minded clients are going in or are inside. It's also important during the hours the business is open.

There are many reasons to pray for each other's sites. Not all sites cover all the hours needed, even during 40 Days for Life, much less during the rest of the year. Imagine if the prayers of others could help during our uncovered hours. We don't want to depend on this, but every bit helps.

There are many people who sign up for a time slot that lasts one hour, but they struggle to pray for a full hour. With a list of more than 30 sites, even one minute of prayer for each site could fill at least half of an hour. Two minutes each could fill an hour.

Abortion referral sites feed business to abortion sites. They can become abortion sites overnight with the technologies that bring about webcam abortions. So it's beneficial to pray for referral sites. If they close, that shuts down an earlier stage in the abortion sales strategy. It can also prevent that site from becoming a future abortion site. Some referral sites are 'weak' sites, open just a day or two per week. With a little prayer and effort, such sites should close quickly.

Abortion sites also deserve our prayers. Some are open 20 hours per week and fit in that 'weak' category. But some are open more than 50 hours per week. It's bad enough when they are open 40 hours per week, but 50+ hours shows that a site is 'busy'. A little effort can save lots of lives.

It's not always easy to keep track of each university's activities with regards to abortion, so the list doesn't include any universities. This was done despite knowing the University of Iowa in Iowa City has been a concern for many years.

Planned Parenthood is united across the entire territory depicted in the map. Although it's good to have distinct pro-life groups throughout the area, we should be united in some way. Prayer is an easy way to unite our efforts with each other.

Here are some intentions you may pray for.

- PP/Abortion Workers
- Clients, especially the abortion-minded
- Women who had abortions
- Drivers
- Passersby & the community
- Pro-Lifers & their activities
- Other intentions...

Evil struggles to gain any stronghold where people pray for each other. So let's multiply the power of our prayers with a web of prayer!

Note:

This should print fine in black and white. This side is optional, but is intended to help people recognize the value of praying for places besides where we are standing at the time we pray.
